## Introducing Cutting-Edge Solutions for Process Optimization

At **MB Sales and Services Co., Ltd.**, we're dedicated to bringing our clients the most innovative and reliable technologies available in process measurement and control. We're excited to announce three new additions to complement our product portfolio, each designed to enhance accuracy, efficiency, and insight across a range of industrial applications.

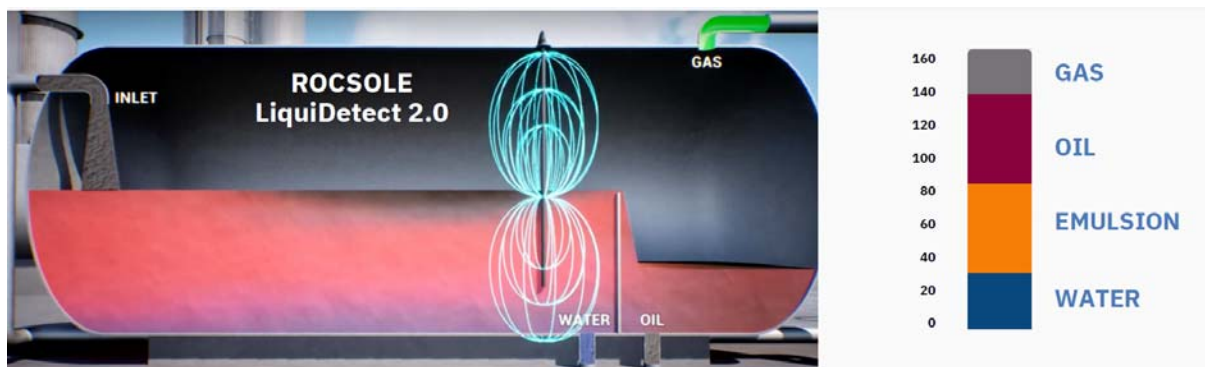

### Rocsole – Intelligent Level Sensors

<https://rocsole.com/>

We're proud to partner with **Rocsole**, a leader in tomography-based level measurement solutions. Rocsole's **Smart Level Sensors** use advanced imaging technology to deliver real-time, non-intrusive insights into multiphase processes — even under the most challenging conditions. Their sensors provide accurate interface and emulsion layer detection in vessels, separators, and pipelines, improving operational reliability and reducing downtime.

#### Key Benefits:

- Real-time process imaging
- Non-radioactive, non-intrusive measurement
- Improved process control and optimization
- Reduced maintenance and unplanned outages

See how it works here on this video link...

## ASTG – Advanced Process Analyzers

<https://astg.com/>

**ASTG (Analytical Science and Technologies Group)** Analyzers deliver precision and performance for demanding industrial environments. Offering a comprehensive range of gas and liquid analyzers and gas chromatographs, ASTG solutions are built for industries that demand accuracy and dependability — from energy and chemical processing to environmental monitoring.

### Key Benefits:

- High accuracy and stability
- Modular, easy-to-maintain design
- Flexible configurations for diverse applications
- Proven performance in critical process conditions

### Our ASTG solutions cater to a wide array of industries and clients, including:

- Specialized Industrial Gas Supplies
- Food and Beverage Manufacturers – **ISBT Approved, CGA<sup>2</sup> and EIGA<sup>3</sup>**
- Semiconductor Manufacturers
- Medical, Pharmaceutical, Biotech, and CBD Processors
- The United States Government

## **Air Optic – Optical Monitoring and Detection**

<https://www.airoptic.pl/>

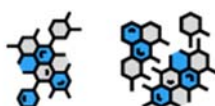

**Air Optic** provides state-of-the-art optical technologies for emissions monitoring and gas detection utilizing tuneable diode laser (TDL) absorption spectroscopy. Their innovative systems combine high sensitivity with fast response times, making them ideal for ensuring compliance, improving safety, and supporting sustainability initiatives.

### **Key Benefits:**

- Real-time optical gas detection for single and multi-components
- Compact and robust design
- Enhanced workplace and environmental safety
- Suitable for both fixed and portable applications

### **Optical Monitoring Products:**

- Cross Path
- Extractive
- Open Path
- Probe
- Custom Solutions
- Single or Multi Component

## Inov8 – Oil in Water Analyzers

<https://inov8s.com/>

**Inov8** are specialists in developing solutions for customers, in a broad spectrum of industries, who need to measure hydrocarbons in water.

The Inov8 range of products are designed to be the most robust, accurate and cost-effective (CAPEX & OPEX) oil in water analysers available on the market.

Utilising Rapid Wave Ultrasonic, Spectrometry, Laser Induced Fluorescence and Deep UV Fluorescence Inov8 have a solution for your Oil in Water analysis needs.

### Key Benefits:

- Reliable
- Accurate Environmental Compliance
- Robust and Trustworthy Technology
- Full Control – Online all the Time

### Industries and Applications:

- Oil and Gas
- Cooling Water
- Environmental
- Manufacturing and Chemical Process
- PAH Monitoring
- Marine Bilge Monitoring
- Municipal Drinking Water
- Offshore Wind Power

## Partnering for Your Success

At **MB Sales and Services Co., Ltd.**, our mission is to connect you with the tools and technologies that empower smarter, safer, and more efficient operations. Whether you're optimizing production, ensuring compliance, or upgrading existing systems, our team is here to support you with expert advice and tailored solutions.

**Contact us today** to learn more about these exciting new products.
